

# Different Types of End Effectors

## Robotic, Manipulator & Below-the-Hook Grippers

01 Electric Grippers

02 Pneumatic Grippers

03 Suction Cups

04 Magnetic Grippers

05 Mechanical Grippers

## Robotic Process Tools

Robotic Welding

Painting

## Robotic Sensors

Some applications also connect sensors to robots, converting them into programmable sensor-orientation devices. Robotic inspection and other applications use these to minimize inspection engineers' hands-on time they would otherwise spend gathering data.

## Applications for End Effectors

Pick & Place

Machine Tending

Packaging & Palletizing Processes

Assembly Tasks

Quality Testing & Inspection

Surface Finishing
