

Unidex Stainless Steel Products for Food Industry

Unidex works with many food industries with special needs. This booklet will show a multitude of products that support, lift, dump, transport, and store product.

Pail handling is an issue when the weights exceed the industry limits and other workers, fork trucks or overhead lift devices are not readily available. Look at these products for different ways of lifting.

Dumping applications

Lift and work tables examples (3 pages)

The workstation below allows a worker to stand on a platform in front of a line. The attached conveyor is fed with racks of product that are power lifted to the worker. A separate portable lift is used to load additional racks when needed. The lift on the right is a transport cart with built-in rollers

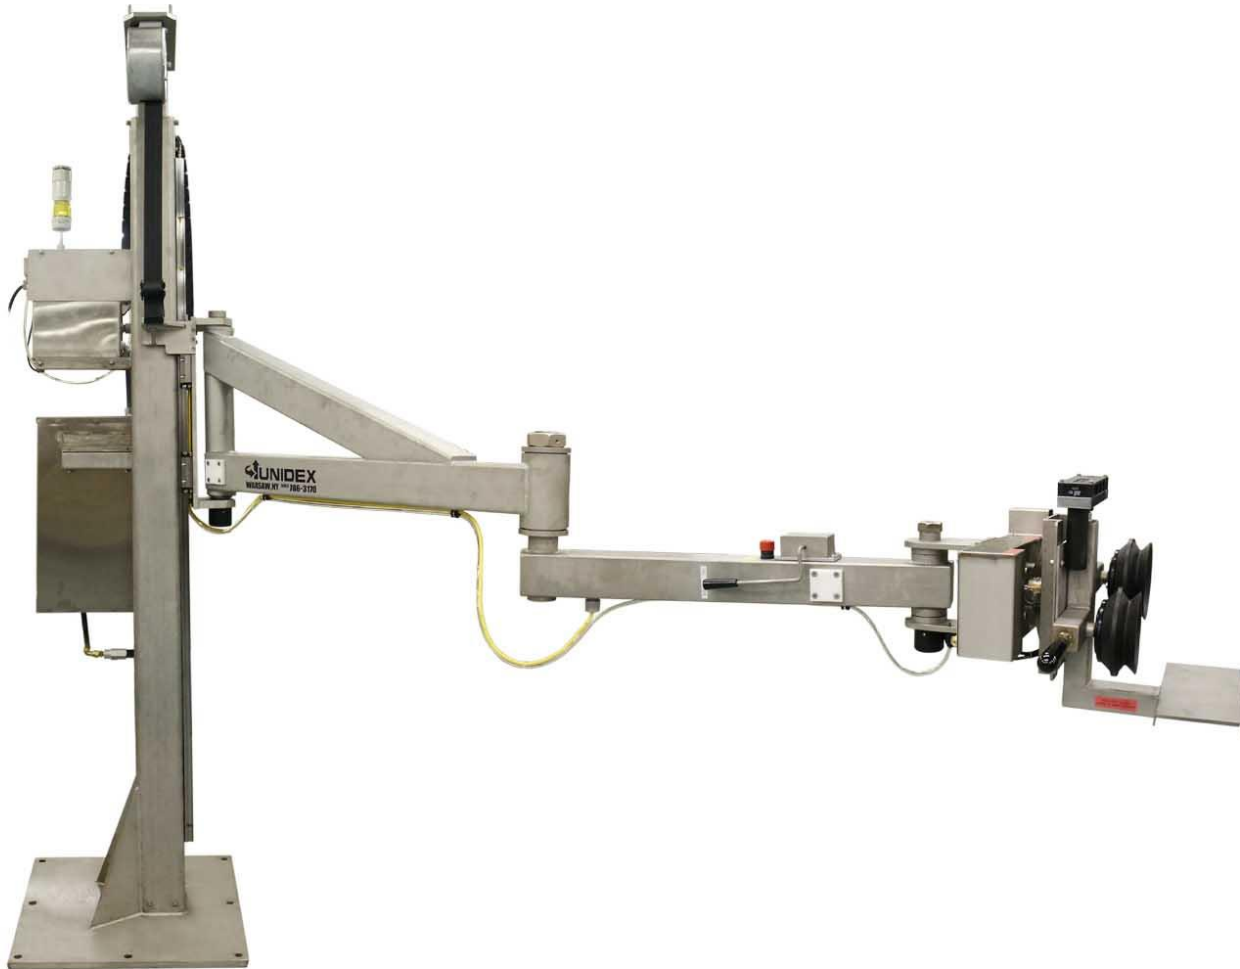

Alternatives for overhead
hoists or fork lifts

Workbenches

The lift on the left is used to pick large frozen boxes of butter off a pallet. The unit on the right is used to pick large containers of frozen chicken.

Lifting bags or pallets to hoppers
