

TPE Electric Workstation Series

The UNIDEX TPE Series of Mobile Electric Workstations has been ergonomically designed to provide durability, versatility, flexibility and safety for your production needs.

STANDARD FEATURES

- Heavy duty 12-volt lead acid type battery powers DC motor
- Battery charger with manual and automatic shutoff built in
- Electric hydraulic lift mechanism located in enclosed box
- Hand-rail mounted pendant control
- Lift capacities to 250 lbs.
- Two 5" locking swivel casters (rear) & two 5" fixed (front)
- Lowered height: 15"
- Raised height: 120"
- 24" W x 36" L footprint
- Bolt plate accepts tables, forks or custom fixtures

TPE Series Mobile Electric Workstations are designed for those applications which must be performed frequently throughout a shift, or where load weight rules out manual handling. A rechargeable battery provides the power to lift and lower loads quickly and without effort. Models are available with load capacities up to 250 pounds. Unlike scissors lift configurations, the area between the legs and table is unobstructed for easy access to machinery, racks and other immovable fixtures.

All UNIDEX workstations are designed and manufactured in the USA to exacting quality standards from welded carbon steel construction. Each unit receives a durable, baked-on powder coat finish, and undergoes rigorous quality testing before shipment.

OPTIONAL FEATURES

- Stainless steel construction
- Fixed and adjustable forks, booms and rams
- Custom fixtures, workholders, grabs, rotators and other manually operated or powered load engagement devices
- All swivel casters

*Quantity discounts available. Other custom features available, please call us to discuss your exact needs.
Payment can be made using American Express, MasterCard and Visa credit cards.*
