

Lean Manufacturing Assembly Systems for Low-to-Moderate Production Volumes with Load Capacities to 10,000 lbs.

Unidex provides integrated lean manufacturing assembly systems for companies manufacturing products, parts or components requiring worker interface and a high level of assembly and/or transfer.

We can provide complete or specialized service from material handling consultation and systems

integration design to the development and manufacture of your lean manufacturing assembly system.

Unidex systems are proven to boost productivity, reduce workplace injuries and improve operations by solving lifting and handling problems.

Lean Manufacturing Assembly Systems

Operational Goals:

- Eliminate wasted motion
- Reduce or eliminate lifting done by workers
- Decrease floor space needed for assembly
- Enhance production efficiency
- Improve quality control
- Introduce greater flexibility and accessibility when working with heavy loads

Typical Applications:

- Aircraft Engines
- HVAC Equipment
- Recreational Vehicles
- Construction Equipment
- Off-Road Vehicles
- Furniture
- Appliances
- Hospital & Medical Equipment
- Tanks & Vessels
- Large Pumps
- Fork Trucks
- Other OEM Products

Unidex manufactures a wide range of standard and “engineered-to-order” ergonomic material handling equipment that can be integrated or modified as required for your lean manufacturing assembly system.

Our product line features floor, mobile and overhead manipulators,

work positioners, workstations, lift and transfer tables, personnel lifts, mobile lifts, workbenches, pallet handlers and cylinder trucks.

We also specialize in stainless steel construction for sanitary, cleanroom or corrosive environments.
