

PORTABLE LIFT TABLES

WITH OPTIONS AND CUSTOM FEATURES

Our lift tables are easily modified with custom top sizes. With larger top size, the leg base is also increased to support the top. We will also increase leg base if you add your own worktop. We can also supply custom supports.

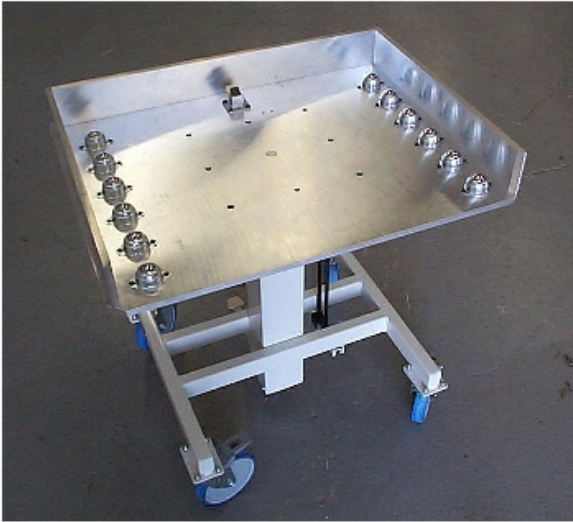

We offer a variety of colors in the event you want to have specific lift tables for specific areas (ex: build, assembly, inspection, rebuild).

Liners of all types can be attached to the tops to help protect your parts: PVC, UHMW, Rubber and Anti-Static.

We get many requests for adding shelves, drawers, and other storage features. See photos below as examples.

Conveyor or roller top examples

Tilt Tops

Indexing or top rotation can be hand lever or foot pedal release.

These lifts were designed to hold weights off the centerline.
Counterweight was added to
eliminate tipping issues.

Specialty lift tables

ESD liner and grounded

V-Cradle to hold tubes

Tandem lifts with custom tube holders

Stainless steel or aluminum tops can be added.

Lift tables with containment edges.

Large tables may require dual supports.

Lift with pneumatic tires

A roller mounted to the edge helps to easily load and unload product.

There are countless ways to use our Unidex Lift tables. Call or email today to get yours!
