

# Workbenches

---

The Unidex Workbench is specially designed with a powerful electric/hydraulic or air-over-oil lift system to lift heavy loads expediently. With the touch of a hand-operated toggle switch, foot pedal or pump foot pedal, the operator quickly and easily brings the table into ergonomically correct zones to accommodate different worker heights, sit-or-stand operations, product transfer, and varying workpiece dimensions. The Workbenches can lift loads up to 500 lbs. and is available with a variety of optional features.

Unidex AHW Series Hydraulic Power-Lift Workbench features an air/oil hydraulic lift system for instant adjustment of working heights.

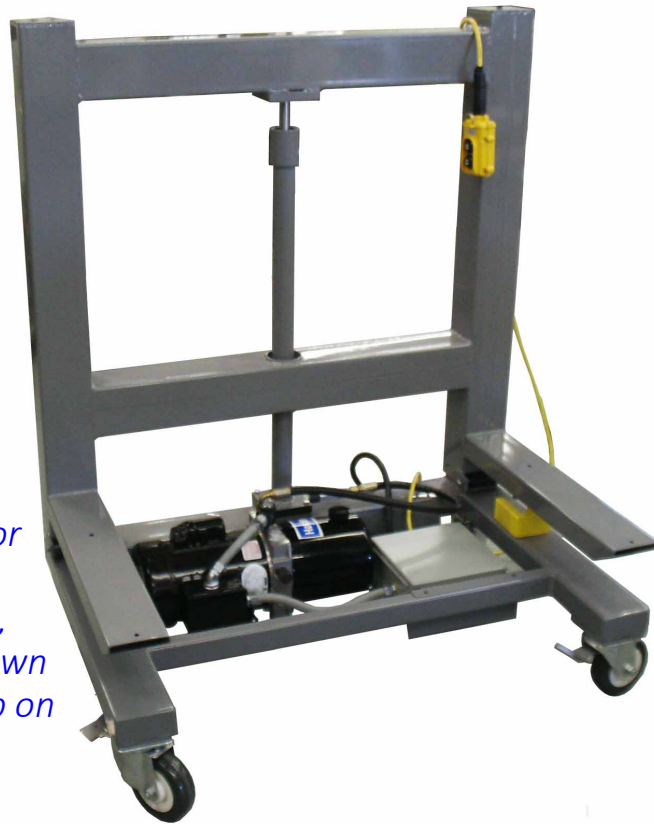

*Customer mounted their own existing worktop on this unit.*

*Customer needed extra features added: overhead light, storage bins and a multi-outlet strip.*

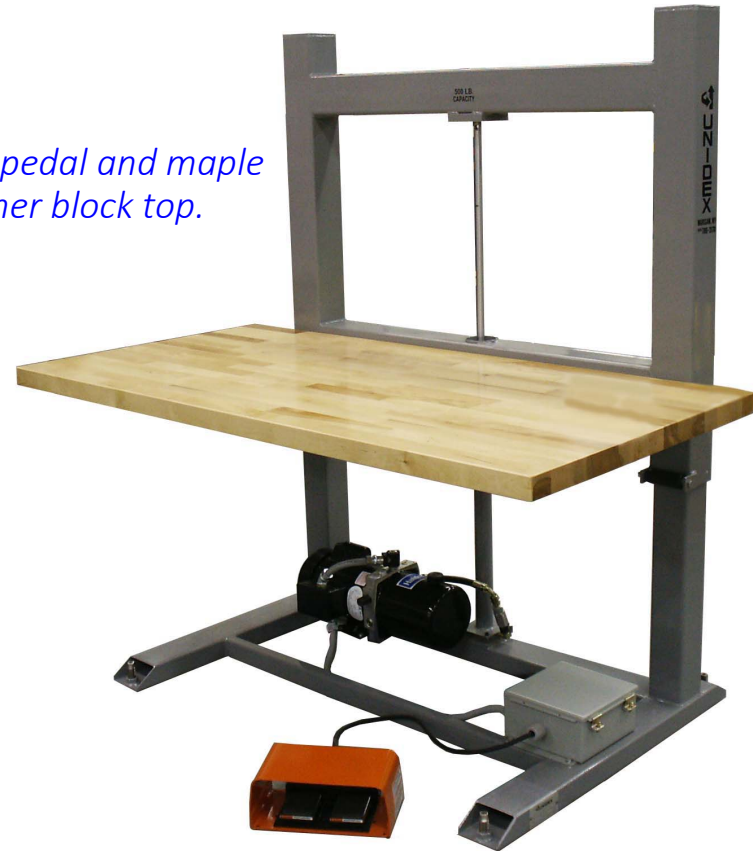

Unidex EHW Series Electric Hydraulic Workbench features an electric hydraulic lift system for instant adjustment of working heights using a foot pedal, toggle switch or pendant.

*Added casters for portability and customer, again, mounted their own existing worktop on this unit.*

*Foot pedal and maple butcher block top.*

## Workbench Options:

- Variety of work surfaces and styles including solid maple, stainless steel, and aluminum
- Various heights and lift strokes
- Cabinets, shelves and drawers
- Stainless steel construction
- Trunion mounts for work rotation
- Custom fixtures/work holding
- Casters for mobility

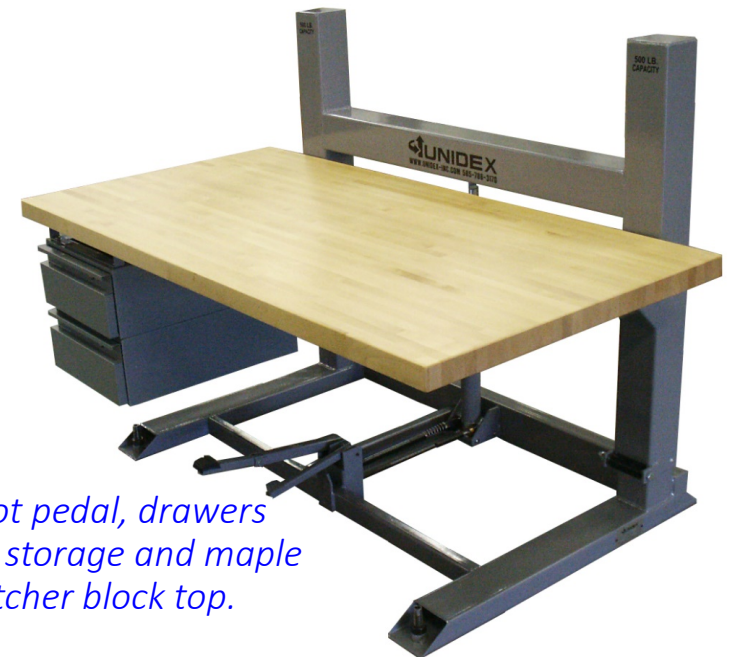

Casters can be added for easy movability and placement around your facility.

As you can see, we can offer a wide range of custom features, from small applications to large ones.

*Foot pedal, drawers  
for storage and maple  
butcher block top.*

Here are three benches for “clean-room” applications. All stainless steel - easy wipe down for your food or pharmaceutical needs.
